

THE SOITRON DIGITAL ACADEMY FOR EDUCATORS

Technology has changed the way we consume information, enjoy entertainment, and the way we learn. Soitron offers schools an opportunity to participate in its digital academy so that they can learn how to fully use the potential of Microsoft Office 365 Education for teaching and communicating with parents and colleagues.

All children are exposed to technology, and they are incredibly fast in absorbing it. To teach in a way that is natural for children, teachers incorporate modern-day technology into their lessons. In short, they speak their language. This works when schools support and encourage teachers to deepen their digital skills.

USE THE POTENTIAL OF TECHNOLOGY AT YOUR SCHOOL

Buying the software, applications, and licences is just the first step. If technology is to become a part of the day-to-day routine at your school, an adoption process must be the next step.

Microsoft Office 365 for Schools offers much more than just teacher–student–parent digital communication. It will help you to discover creative teaching methods which get children interested in a topic without realizing that they are being taught something.

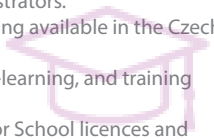

OFFICE 365 ADOPTION

THE SOITRON DIGITAL ACADEMY FOR EDUCATORS

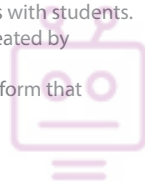

DIGITAL SKILLS TRAINING FOR EDUCATORS

- Office 365 for Schools interactive training for educators and administrators.
- DVPP-accredited training available in the Czech Republic.
- Webinars, helpdesk, e-learning, and training materials.
- Microsoft Office 365 for School licences and setup.

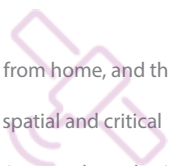

THE CHATBOT AS A MODERN TEXTBOOK

- A chat robot that communicates with students.
- Simple chatbots can even be created by teachers themselves.
- Digital educational content in a form that students are accustomed to.

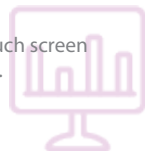

MINECRAFT FOR TEACHING NATURAL SCIENCES

- Children know the game from home, and they learn by playing.
- It nurtures creativity and spatial and critical thinking.
- It is ideal for teaching subjects such as physics and chemistry.

INTERACTIVE HARDWARE FOR MODERN SCHOOLS

- Microsoft Surface interactive touch screen with full Office 365 functionality.

WHAT DO YOU GET?

- Improved digital skills and the increased qualification of educators.
- A personalized approach to training and responding to the real needs of educators.
- More effective school management with easy-to-use Office 365 tools.
- Learning about modern ways of teaching.
- An introduction to easy and secure ways of communicating with parents.
- Document sharing between the school management and educators.
- Easier communication and more effective collaboration.
- Cost optimization.

Give teachers digital skills, and you will get a double return in the form of happy students and parents.

WHAT DOES ADOPTION LOOK LIKE?

FIRST MEETING

We present our offer and map the needs of your school.

OFFICE 365 DEPLOYMENT

If your school already has a cloud solution, we examine how effectively it is used and define any necessary steps for improvement.

MONTH 1

OFFICE 365 TRAINING 1

Individual training sessions are adapted to the needs, knowledge, and skills of each participant.

HELPDESK

Between the training sessions, our remote assistance is available to you.

OFFICE 365 TRAINING 2

This builds on Training 1.

HELPDESK & WEBINARS

You can consult any questions arising from the past training sessions or refresh your knowledge through webinars.

OFFICE 365 TRAINING 3

The final training session builds on the two previous ones and supplements any topics that have not yet been covered.

HELPDESK & WEBINARS

Even after the training is over, you may still contact us with any questions. Webinars are recorded to serve as a tool for self-study.

E-LEARNING

Study materials will be available to you in the form of online supplementary courses.

CERTIFICATE

At the end of the training process, you can take a short quiz and get a Microsoft certificate.

MONTH 6

OTHER SERVICES FOR SCHOOL

Network environment

- Setting up a network environment compliant with the school's connectivity standard.
- Existing computer network and WiFi optimization.
- Remote access to the school network for teachers.

HW for schools

- Computer classroom equipment (computers and network).
- A multifunctional network printer to resolve printer shortage issues.

Routine process automation

- Including for purchase orders and wages.

Network security

- Designing and building a fast and secure network with centralized management and user authentication.
- Secure network access (NextGenFirewall).
- A secure network-to-network interconnection using a VPN.

IoT for schools

- The use of IoT sensors (including for energy consumption metering, operating cost optimization, and classroom CO2 and illumination levels monitoring)
