We design software solutions based on highest security & privacy standards including on premise, cloud or hybrid models. With our strong CEE presence – we offer quality talent allowing reduced time to market.

APP SERVICE CATALOGUE

MODERN DEVELOPMENT SERVICES

Services focused on the cutting edge of industry and technology trends in the market. The primary components of the Modern Development Services are:

- Web Application Development
- Mobile Applications Development
- Applications Development for Cloud
- Application Security Services
- Integration with other Applications

APPS MODERNIZATION & CUSTOMISATION SERVICES

Build around the needs of developing applications for the needs of the New Style of IT, our Specialized Development Services are classified into following:

- Application Modernization Services
- Apps Customisation services
- Migrations to Cloud

APPS TESTING & MAINTANANCE SERVICES

Build around the needs of critical element of apps functionality, starting from the early software lifecycles, to enable detection of possible issues ASAP to avoid future cost

- Application Maintenance (Mobile, Web, Desktop, Integration)
- Application Testing

MODERN DEVELOPMENT SERVICES

Our Project and Consultancy Services are focused around key knowledge areas that are demanded on the market & our competence centres

- Consulting Services
- Process Improvement Services
- ITSM consulting
- SFDC consulting
- SAP consulting

MODERN DEVELOPMENT SERVICES

Applications Development for Cloud

- Azure Applications
- Amazon Web Services
- Google Apps Services

Mobile & Web Applications Development

- Custom Application Development
- Android Applications
- Cross Platform Mobile Apps
- iOS Applications

Applications Security

- Security Assessment
- Secure Code Analysis
- Security Requirement

BENEFITS

- Extended value beyond body leasing
- E2E advisory in creation process from MVP to full operating product
- Comprehensive Application Security
- Increased Flexibility / Agility
- Reduces application development and implementation risks
- Application Integration and Testing Services

APPS MODERNIZATION & CUSTOMISATION SERVICES

CHARACTERISTICS

Modernization of the Legacy application landscape:

- Determination and implementation of the right modernization strategy & transformation plan for legacy applications
- Migrations to Cloud
- Alignment to the business and technology strategies of the clients business
- Delivery of quality, performance, security
- Retirement of Legacy applications and data

Platform Customization

- SharePoint
- MS Dynamics
- MS Office & O365
- ITSM (SNOW)

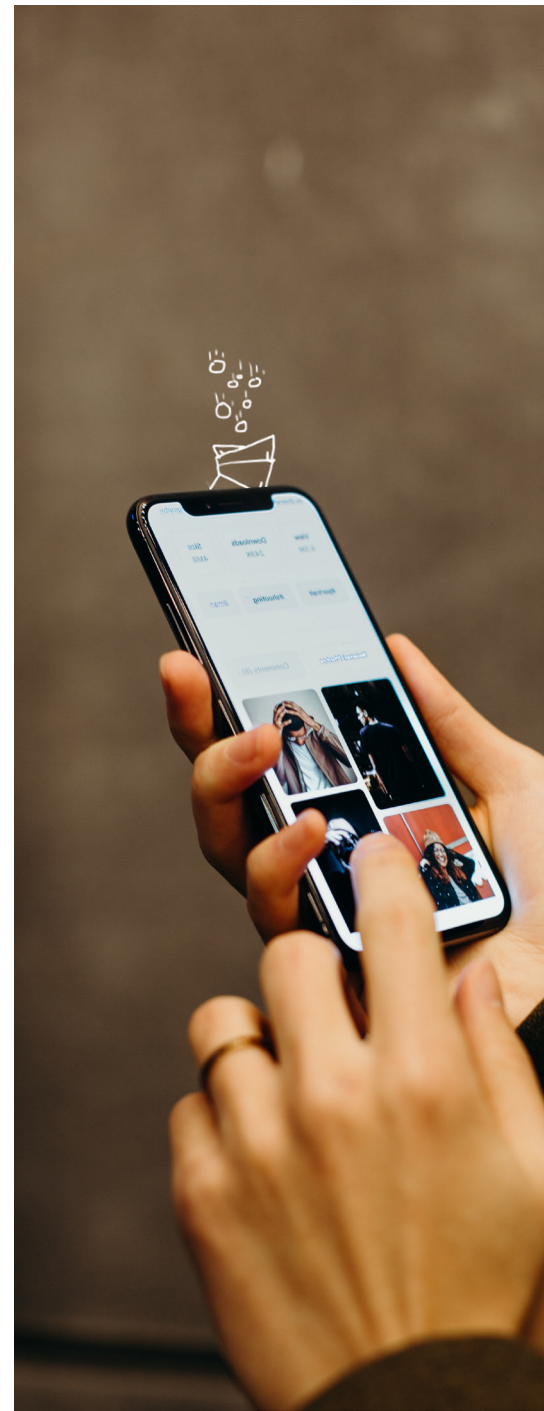

Application Modernization Services

- Legacy to Java
- Legacy to MS.Net
- VB to MS.Net Migration
- Lotus Notes to SharePoint
- Win10 Application Migration
- MS.Net Version Upgrades
- Java Version Upgrades
- Application Server Migrations

BENEFITS

- Optimized cost & quality
- Extended value beyond body leasing
- Improved customer satisfaction
- Increases flexibility and responsiveness to workload demands
- Reduces application development and implementation risks
- Predictable high quality delivery
- Process effectiveness

APPS TESTING & MAINTENANCE SERVICES

MAINTENANCE CHARACTERISTICS

Design support model that is:

- Standardized on a supportable technology framework
- Business Critical for customers
- Adaptive to change
- Reliable and SLA bound
- Cost-effective implementation and maintenance plan

MAINTENANCE BENEFITS

- Maximize the effectiveness and value for business
- Extended value beyond body leasing
- Improve quality and reduce defects in business applications
- Improve responsiveness and shorten time-to-market
- Ongoing support dependent upon business criticality and vulnerability
- 24/7

DEVELOPMENT & MAINTENANCE

Desktop Applications

Web Applications

Web Services

Integration Services

Legacy Applications

TESTING CHARACTERISTICS

- Proven testing techniques, tools, test and methodologies,
- in line with internationally recognized standards.
- Our approach guarantees, that new functionalities and changes will be respectively verified, before the product will be released to implementation.

Application Forensics

- Code quality analysis,

Application Testing

- Code forensics & Test Strategy Planning
- Performance Testing
- Functional Testing
- Automated Testing
- Manual Testing
- Localization Testing
- Documentation based, process orientated
- Exploration tests

TESTING BENEFITS

- Bug free
- Supported independent on the code origin
- Project Recovery & Get-Well planning
- Flexibility and responsiveness to workload demands
- Reduces application development and implementation risks
- Enhances customer development capabilities
- Full responsibility for solutions quality
- Services based on the result according to SLA

CONSULTANCY AND PROJECT SERVICES

CHARACTERISTICS

Reduce project cost and risk through the provision of experienced:

- Project management and office staff assist customers to reduce project risk through effective governance arrangements
- Industry experts to help define the business requirement and plan the business implementation
- Technologists to assist select optimal technology platforms for new applications
- Application architects to help structure new applications to protect operational performance and stability and enable flexible enhancement
